**A simple to use FREE service for patients and receivers of care everywhere!**

# What is Patient Latest?

Keep in touch with your family FREE of charge whilst you are a patient, resident or in receipt of care with our secure contact system.

We save your time and money whilst making keeping in touch with loved one's and your special people immediate and easy. Let this simple to use service do your talking so you can concentrate on getting better.

No need to make and take numerous phone and text messages sometimes daily when you aren't well or if your special person normally does this, this can become laborious and tiring, just one message will keep everyone you invite and allow to see your secured page up to date with your latest situation.

We help to save your care staff time each day by them not having to take phone calls and relay the same message repeatedly concerning their patient or care receiver to different enquirers. You save their precious time.

You have the control to post latest updates on your progress on a personal secured private page as often as you like. You invite only those people you exclusively want to see your updates 'your chosen special people'. No one else can see or read your updates on your personal secured page.

You can give permission for a 'special person' of your choice to register on your behalf and make the updates for you. This might be a partner, spouse, family member, friend or anyone else you trust to act on your behalf in this matter.

Enjoy reading messages of support from your loved one's, family, relatives, friends, colleagues and all of your special people that you invited to exclusively view your secure private web page on our site.

Start saving your effort, time and money immediately you have nothing to lose, there are no strings, free means free!

## How it works

**Register  
Account**

**Create Patient  
Profile**

**Add Email  
Contacts**

**Message  
Users**
